## 05\_Upgrade Duet Web Control (DWC)

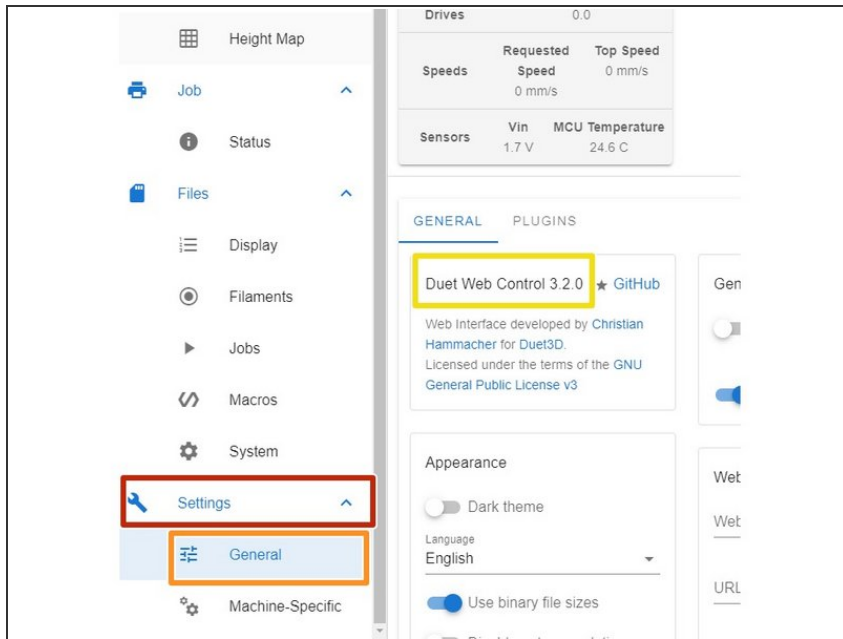

This guide describes how to update the Duet Web control software

Written By: Caribou3d

The screenshot displays the CaribouDuet web control interface. The top navigation bar includes a menu icon, the title 'CaribouDuet', a 'Send code...' input field with a 'SEND' button, an 'UPLOAD & START' button, and a red 'EMERGENCY STOP' button. The left sidebar contains a list of controls: Control (selected), Dashboard, Console, Height Map, Job, Status, Files, Display, Filaments, Jobs, Macros, System, Settings, and General. The main content area is divided into several sections:

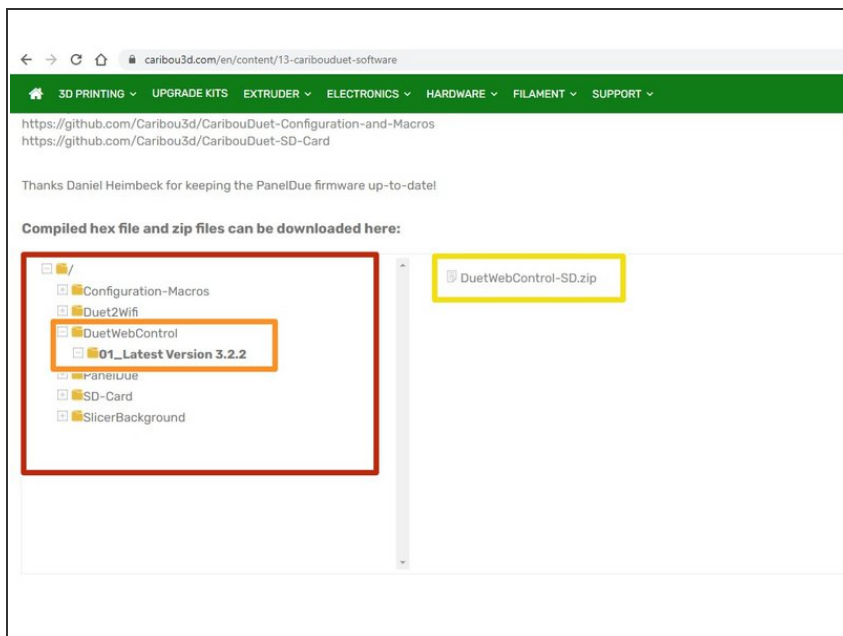

- Status:** Shows 'Off' status, 'Mode: FFF', and 'Tools + Extra' (Control All). It includes a 'No Tools' message.
- Temperature Chart:** Shows 'No Data'.
- Machine Movement:** Includes 'HOME ALL', 'COMPENSATION & CALIBRATION', and a table of movement commands (HOME X, HOME Y, HOME Z) with various offsets. A warning message states: 'The following axes are not homed: X, Y, Z'.
- Extrusion Control:** Includes 'Feed amount in mm' and 'Feedrate in mm/s' controls with numerical input fields.
- Macros:** A list of macros including '01-Test\_IR\_PD\_Ho...', '02-Test\_Fans', '03-Test\_Heaters', '04-Test\_motors', 'SETNETWORK14', and 'SETNETWORK24'.

## Step 1 — Check the installed version

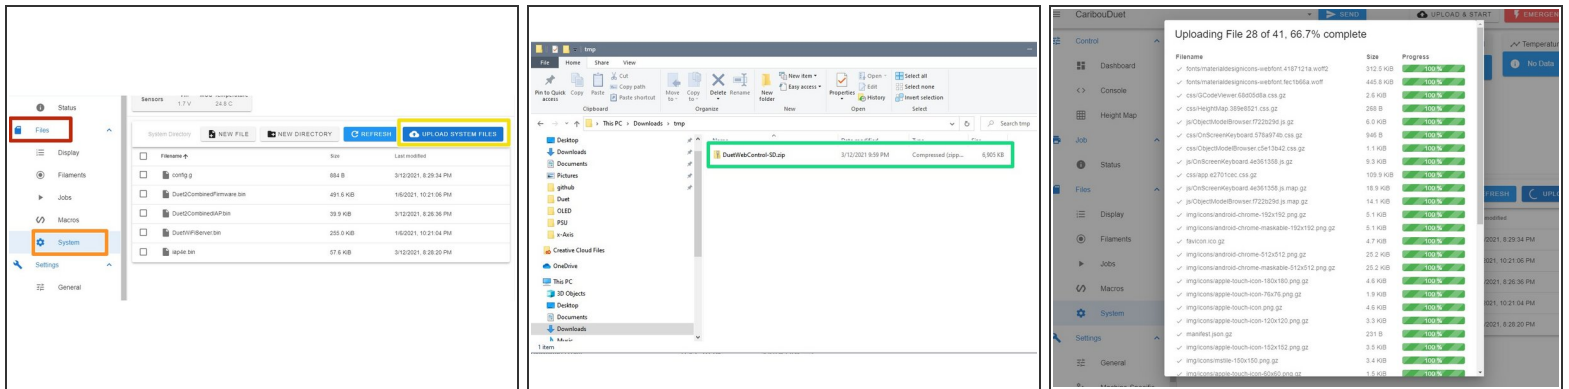

- Click the following buttons in your Duet Web control:
  - Settings
    - General
    - check the current version number

## Step 2 — Check the current version

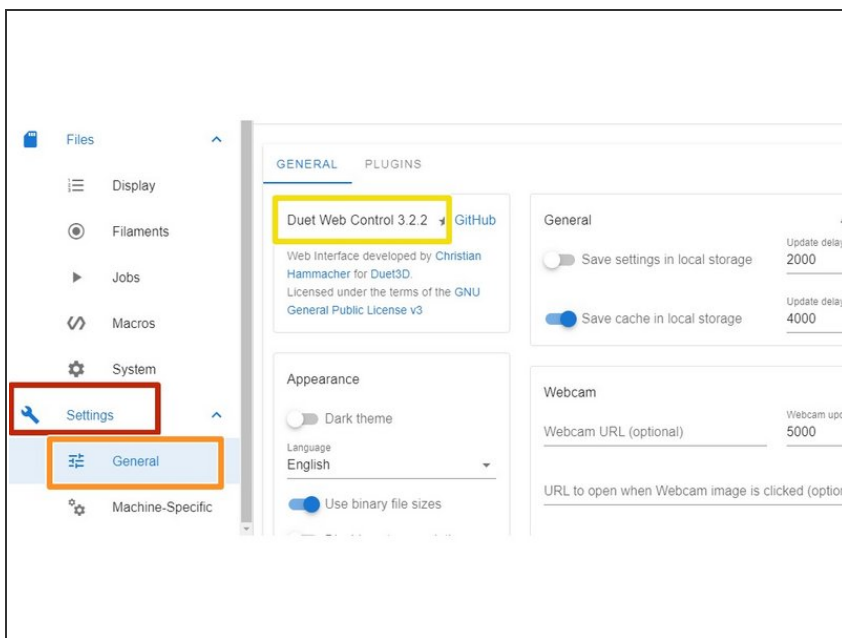

- Check the current version that is available [CaribouDuet software folder](https://github.com/Caribou3d/CaribouDuet-Configuration-and-Macros).
  - In the file manger of the website click on the following items:
    - Duet Web Control
    - 01\_Latest Version x.x
  - *i* x.x is a place holder for the version number. At the time when this guide was written ist was 3.2.
- If the is a higher version number as your installed one is available then download the file **DuetWebControl-SD.zip**.

## Step 3 — Upload of system file for DWC

- Click on the following buttons in your Duet Web control:
  - Files
  - System
  - Update System Files
- Chose the file "**DuetWebControl-SD.zip**" that was downloaded in the previous step and click "open" to upload the file.
- The file is now automatically extracted and the update starts.

## Step 4 — Check the installed version

- Click on the following buttons in your Duet Web control:
  - Settings
  - Files
  - check the insatlld version
- ① here you should see the updated version number
- ① The update was succesful.
